DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 2, 9 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation "said body" in section d), subsection (6), line 2. There is insufficient antecedent basis for this limitation in the claim. This should be --said body unit--.

4. Claim 2 recites the limitations "the flexed configuration" in section k), line 5, and "the unflexed configuration" in lines 8 and 9. There is insufficient antecedent basis for these limitations in the claim. These should be --the flexed condition-- and --the unflexed condition--, respectively.

5. Claim 9 recites multiple limitations, including but not limited to: "the handle portion" (3X) in section a), subsection (6), lines 1 and 2, subsection (7), line 2, and section b), subsection (1), lines 3 and 4; "the wall" (6X) in section b), subsection (1), lines 1 and 3, subsection (2), line 1, section b), subsection (2), line 1, section d), subsection (1), lines 1 and 3, and subsection (2), line 1; "the second wall" in section c), lines 3 and 4; "the signal section" (5X) in section c), line 4, section d), subsection (6), lines 1 and 2, sub-subsection (A), line 2, sub-subsection (E), lines 1 and 2, and sub-subsection (E), sub-sub-subsection (i), line 2; "the handle section" in section d), subsection (1), line 4; "the first wall" (2X) in section d), subsection (6), sub-subsection (A), line 1, and sub-subsection (E), sub-sub-subsection (i), lines 1 and 2; and, *["the body unit is in the

Art Unit: 3644

unflexed condition" (2X) in sub-subsection (G), lines 7 and 8, and section e), lines 4 and 5; "the body unit is in the flexed condition" in sub-subsection (G), line 13, and section e), lines 12 and 13]*. There is insufficient antecedent basis for these limitations in the claim. Examiner has attempted to discover all instances, but caution should be used when revisiting and revising the claims for proper antecedent basis resolution. *Regarding the use of the flexed and unflexed condition above, while the intermediate member is a portion of what makes up the body unit, proper antecedent basis would dictate that the intermediate member is the only portion positively recited to be flexible between those two conditions, and not the body unit itself. Arguments in opposition to the examiner's assertion would be considered.

6. Claim 14 recites the limitation "the at least one signal device...is positioned in...the second container" in lines 1 – 6. There is insufficient antecedent basis for this limitation in the claim. Examiner notes that claim 10, section c), recites, "at least one signal device in the first container". There is no basis to broaden the limitation to include the second container.

Allowable Subject Matter

7. Claims 3 – 8 and 10 – 13 are allowed.

8. Claims 1, 2, 9 and 14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record discloses a fishing rod comprising a body unit as claimed, a power system as claimed, and a signal control system. However, the prior art of record neither discloses nor fairly teaches the recited limitations of the claimed invention including, but not limited to: a signal (light-emitting, sound-emitting, vibratory) element making an electrical connection upon flexing

Art Unit: 3644

of an electrically conductive pin and a coil spring relative to each other where electrical contact is made between these two elements during that flexing, and, subsequently broken when not flexing relative to each other.

10. This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).
